Live Flight Information System (LiFiS) is a plug-and-play live flight information board for use in hotel lobbies, public transport interchanges and other indoor public spaces.

Note: Under ITSPE's policy of continuous development and improvement, this product may undergo changes in the future.

LIVE FLIGHT INFORMATION SYSTEM

Live Flight Information System (LiFiS) is a self-contained, compact live information display system. The system, when turned on, launches the LiFiS application. The application connects to our cloud-hosted LiFiS backend and retrieves the latest live flight information to be displayed. Install, power it on and you are done – it is as simple as that.

LiFiS advantages

- **Compact:** Small, self-contained unit along with a TV display
- **Easy installation:** No need for ethernet cables. Mount the unit, connect to electrical power and turn it on.
- **Autonomous:** Turn it on and it works
- **Custom display:** Choose from a list of display styles
- **Custom messages:** Display customised messages
- **Multi-lingual:** Can display information in English and other languages

- **Easy maintenance:** Hassle-free, online maintenance
- **State-of-the-art technology:** Latest hardware and software technology

Components of LiFiS

- **The Display Unit**
 - LED TV
 - A mini-PC
 - Voltage stabiliser
 - A localised Wi-Fi hotspot using a 4G/3G dongle if no Wi-Fi is available
- **Backend:** A cloud-hosted backend that supplies the latest flight information
